... products from Canada

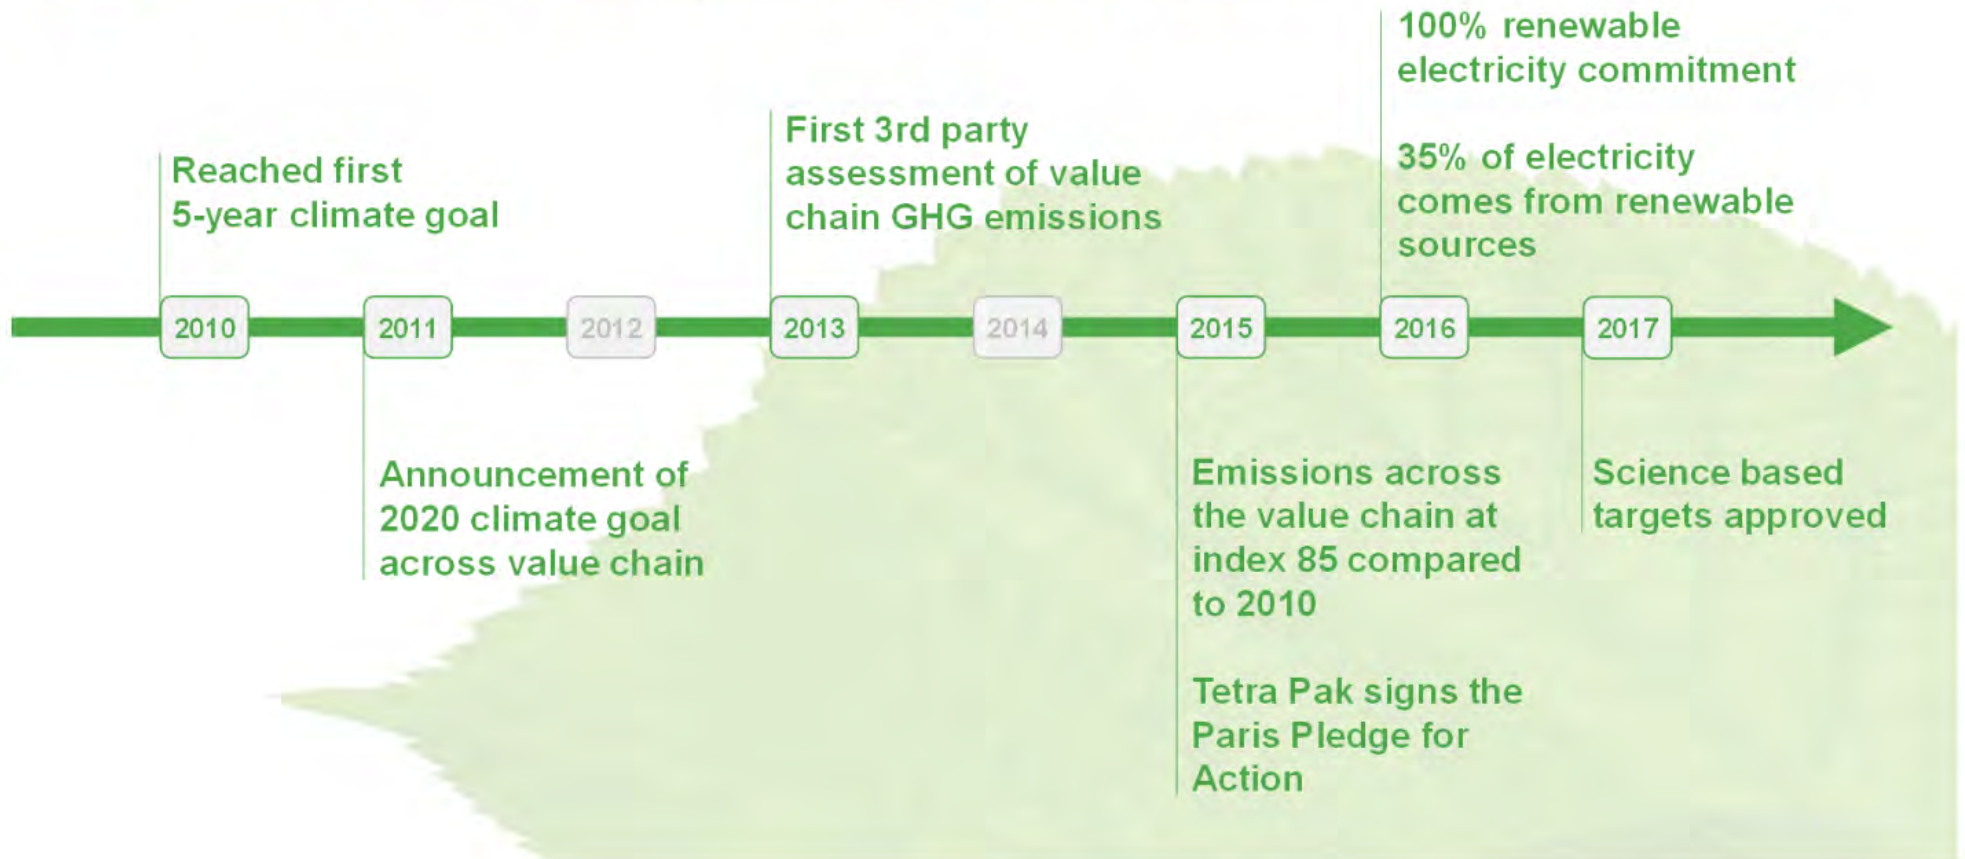

Why did Tetra Pak commit to SBT?

The logical next step following a series of actions

Tetra Pak's Science Based Target commitment

First company in the food packaging industry with SBT approved targets

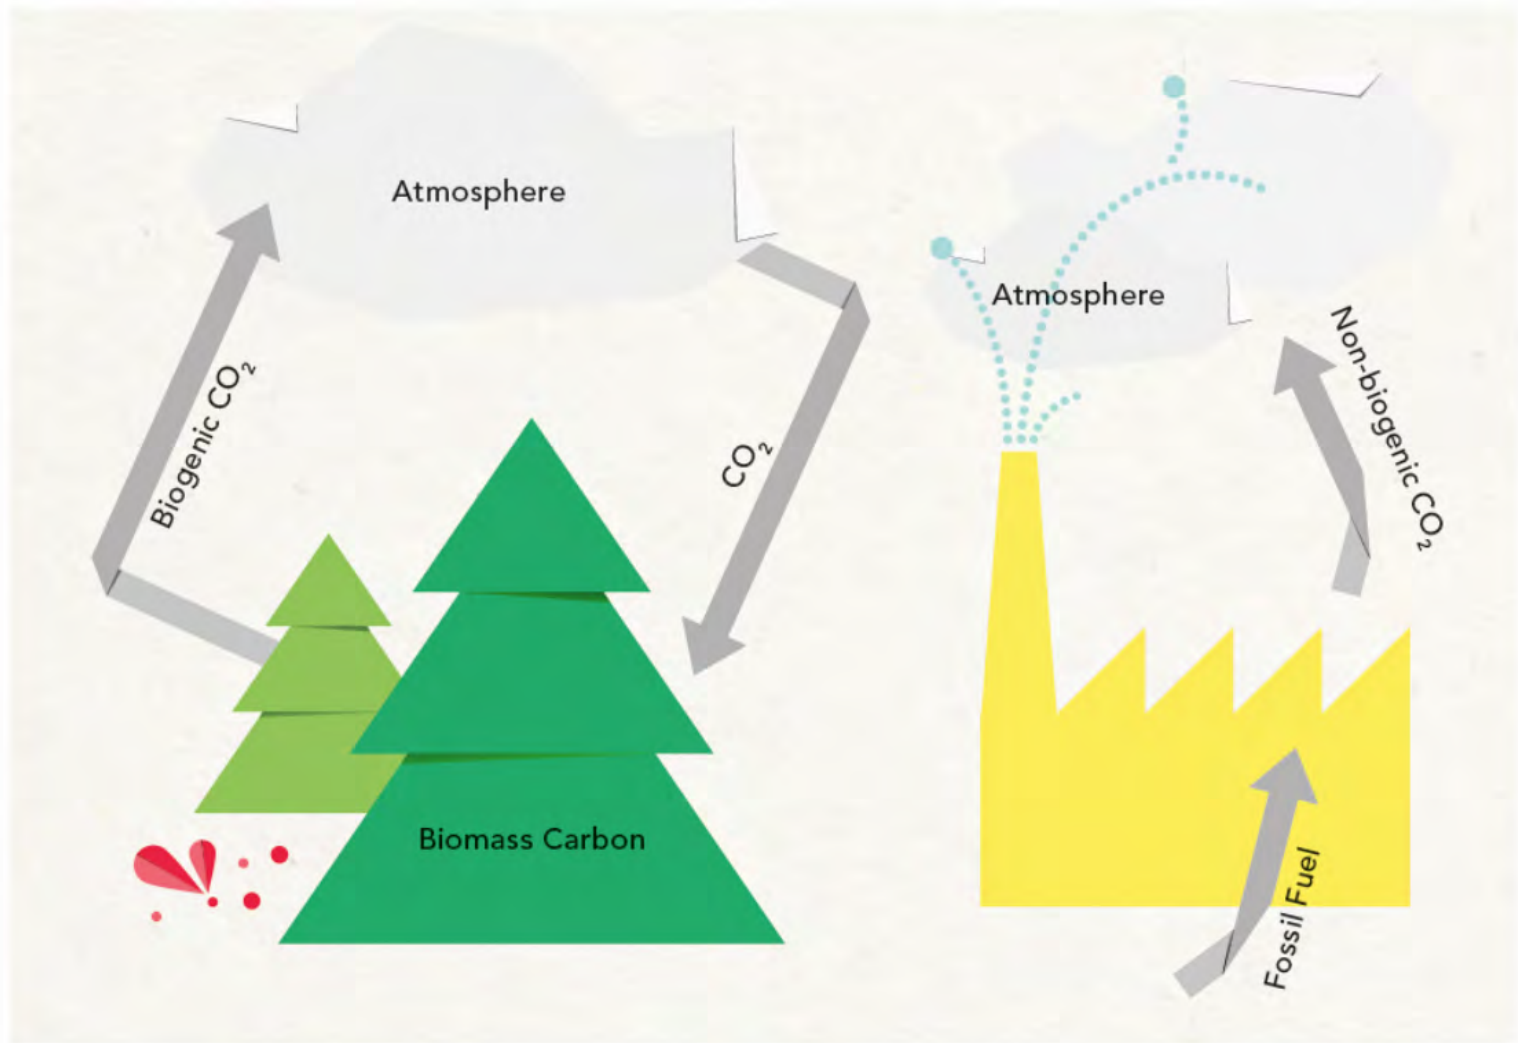

We commit to reduce **operational** GHG emissions **42%** by 2030 and **58%** by 2040, from a 2015 baseline.

Also, we commit to reduce GHG emissions across the value chain **16%** per unit of revenue by 2020 from a 2010 baseline.

TETRA PAK
CONGRATULATIONS
YOUR **SCIENCE-BASED TARGET**
HAS BEEN APPROVED!

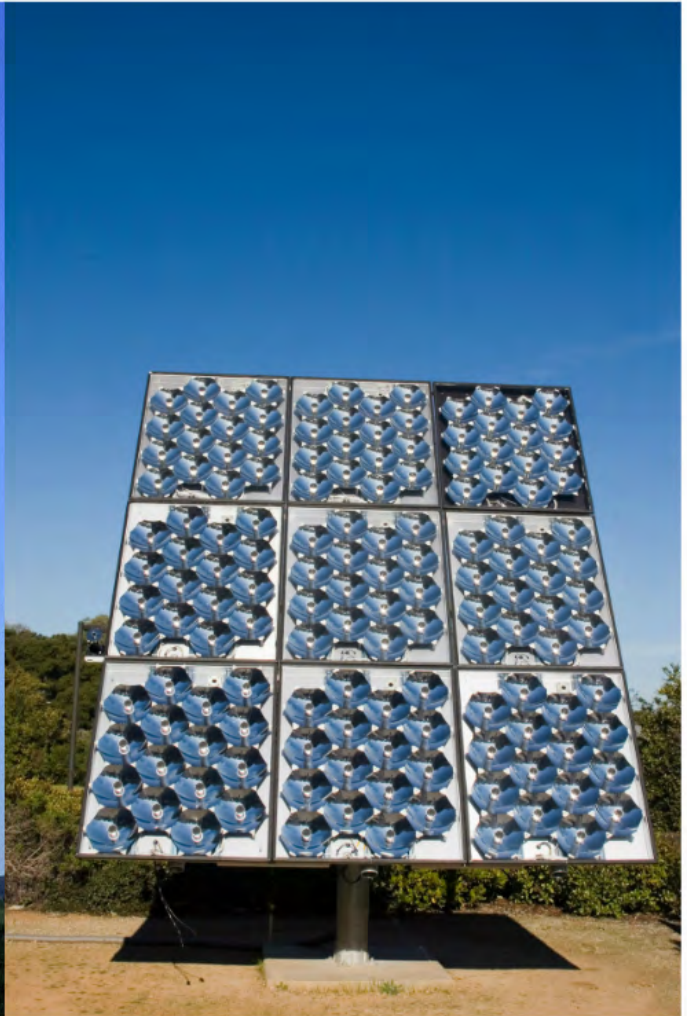

Together with energy, material choice is key

The world's first, & still only, fully renewable beverage carton

Since 2014 more than
10'000 tons of fossil plastic
has become **PLANT BASED**

Tetra Pak to develop paper straws for its portion-size carton packages

Tetra Pak aims to launch a paper straw that is suitable for its portion-sized carton packages before the end of the year, as part of a broader programme to help address the issue of plastic straw waste.
